# H<sub>2</sub>OK product line - what we offer

The Norit H<sub>2</sub>OK range is a complete line of high performance purifiers, filters, conditioners, softeners and sanitizers. We offer tailored solutions with customized branding and specialist fittings to meet your customers' specific needs.

Along with membrane-only versions, our range of purifiers and filters are also available with activated carbon for removing specific contaminants, such as chlorine and heavy metals.

## WaterPurifiers

- Virus, bacteria and cyst removal
- Chemical contaminant reduction
- Taste and odor improvement

Including the premium WaterPurifier+ for water coolers, vending and food services - tested according to NSF P231.

## WaterFilters

- Bacteria and cyst removal
- Chemical contaminant reduction
- Taste and odor improvement

## WaterConditioners

- Chemical contaminant reduction
- Taste and odor improvement
- Turbidity removal

## WaterSofteners

- Hardness reduction
- Chemical contaminant reduction
- Taste and odor improvement

Hardness reduction levels are preset for your specific needs. Ideally suited to the coffee machine and vending markets, all softeners are combined with activated carbon.

## Sanitizers

- Biofilm removal
- Safe, tasteless and odorless
- Food and Drug Administration approved

We offer a line of sanitization rinse and spray products for water cooler and vending machines. Used with our H<sub>2</sub>OK sanitizer rinse, the cleaning cartridge is strong on contamination yet mild on your system.

# H<sub>2</sub>OK = Ultimate protection + innovation + great taste

## Membrane technology in action

Microbiological outbreaks in water supplies do happen and simple disinfection does not always offer enough protection for the end user. To guarantee safety every time, Norit products have hollow fiber membranes, with billions of microscopic pores small enough to retain viruses, but large enough to allow vital minerals through. Our membrane cartridges offer unique FailSafe protection, which ensures the filter will block towards the expiry date.

## The next step in activated carbon

Due to its porous structure, activated carbon can bind chemical contaminants, such as pesticides, medical residues and heavy metals if present in drinking water. Taking this to the next level, the Norit H<sub>2</sub>OK range includes a special grade of certified activated carbon for point-of-use applications which also greatly improves taste and odor.

## Ion exchange resin - softer water and great taste

Continuous heating of water can cause build up of insoluble carbonates (lime scale) in cooler and vending machines, resulting in high energy consumption and poorly functioning equipment. Ion exchange is the most effective way to treat temporary hardness of water. It replaces insoluble carbonates with sodium ions, resulting in less scaling of machines and a better taste.

## Win business with easy options

Norit H<sub>2</sub>OK cartridges have quick connect couplings for easy and hygienic handling. We also offer a tailored service to customers, including customized fittings and private label branding - a great way to ensure repeat business for your company in this competitive industry.

## Your safety guarantee

All our products are tested by independent testing laboratories for microorganism, chemical and hardness reduction performance and meet the water industry's highest standards.

## Innovation for today's market

Norit, headquartered in The Netherlands, is an innovative leading supplier to the water and beverage industries. With almost a century of experience, the Norit Group supplies consumables, components, systems, and solutions, based on proprietary technology in every step of the water and beverage value chain. More than 8 percent of the world's population – over half a billion people – is already consuming water purified by Norit!

Norit Filtrix, part of the Norit group, specializes in developing, manufacturing and marketing of point-of-use products based on membrane, activated carbon and ion exchange technology. Our products are applied in commercial, residential, recreational and healthcare markets.

With customer service a top priority, Norit Filtrix products are sold all over the world by major distributors in our key markets. We also develop and manufacture custom products for the OEM market.

As a member of the Water Quality Association, we strive to develop technologically superior products which meet our customer's needs at competitive prices. The Norit Filtrix Quality Management System is certified to ISO 9001:2000 standard and each product is individually quality checked.

Our H<sub>2</sub>OK point-of-use product range displays exactly what we strive for: smart, innovative technology, specifically developed for the commercial drinking water market.
